05 Enable Secure Print

## Quick Guide

- On the <u>Canon website</u>, select your version of <u>MacOS</u> as the operating system and download the driver **UFR II/URFII LT Printer Driver & Utilities for Mac**.
- Run the downloaded file and follow the instructions to install the driver.
- In your Mac System Settings select Printers & Scanners and then Add Printer, Scanner or Fax...
- Choose IP as the installation method and enter as Address 172.18.14.120
- For Protocol select Line Printer Daemon LPD.
- Choose a name and location for the printer e.g. Canon 4945 & 2nd floor
- Under Use select Select Software..., search for 4945 and select Canon iR-ADV 4945
- To use *Secure Print*, go to the printer settings in the software you print in, e.g. Adobe. Select **Printer...** and under **Printer Options** select **Special Features**
- In the drop-down menu under **Job Processing** select *Secured Print*. After you click **OK** and **Print** enter a document name, user name and the PIN.
- At the printer, select your print job in the Print menu and start it by entering your PIN
